

# Green Sweep<sup>®</sup>

A green sealing solution for exterior doors

Looking for the right sealing solution to infiltrators? Manufactured in the U. S. A. from environmentally friendly, PVC free materials. Green Sweep features the following:

- Multi-fin and bulb construction – preferred design, provides a superior seal in any weather condition and protects against moisture, air, dust and various infiltrators.
- More durable, tear and crack resistant than PVC
- Special filled base materials provide better low temperature (-30 °) and high temperature protection than PVC.
- Recyclable materials
- Competitive pricing

Styles and colors available for most steel, wood and composite door applications. Can be used for standard size and custom - sized entry doors.

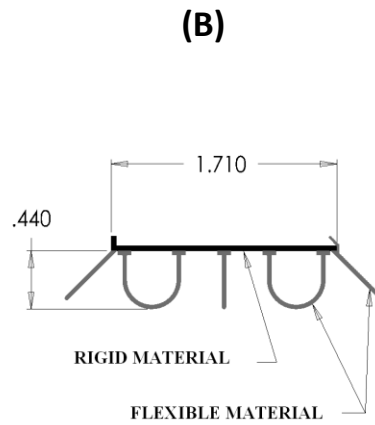

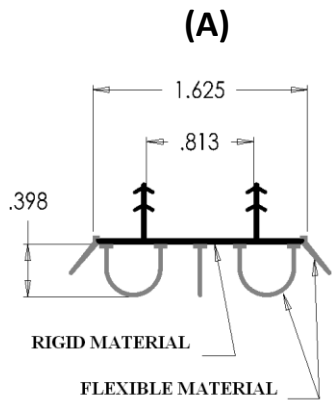

As an ISO 9000:2000 certified company, with state of the art equipment, we produce consistent, quality parts with every shipment. Co-extrusion capabilities include dual materials and multi-colored parts. We provide in-line and secondary cutting, punching, drilling, labeling, marking and assembly of components to our extruded parts. We offer product design assistance with the latest equipment technology in profile extrusion.
